OXFORD THREE SEATER PLUS

Greatly improved, this model will provide generous bench seating for 3-4 passengers (dependant on size). Entry is made simple by heavily hinged front and rear dashes. Panoramic views are obtained through the fully protective "LEXAN" screens which may be tinted as an optional extra. Full weather protection is obtained by separate front and rear hood covers. Ventilation louvres are provided.

The Chassis is a specially strengthened and widened version of our well established Super Silk wrap around tubular design, featuring our newly introduced Sports Mudguard incorporating side lights, brake lights and indicators. Standard tyre as fitted 145 x 10 Radial ply, but optional extra is an alloy wheel fitted with an 165 x 10 SR70 Radial tyre, either, being hydraulically

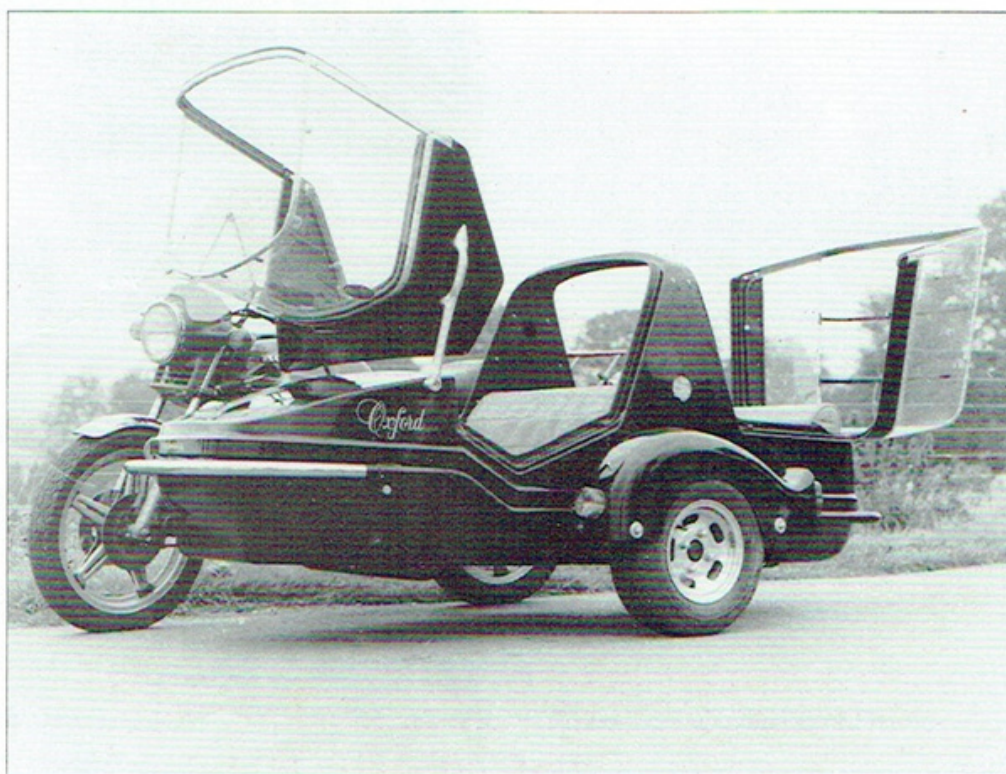

controlled by a heavy shock absorber giving an ideal suspension and extra comfort with rigid attachment.

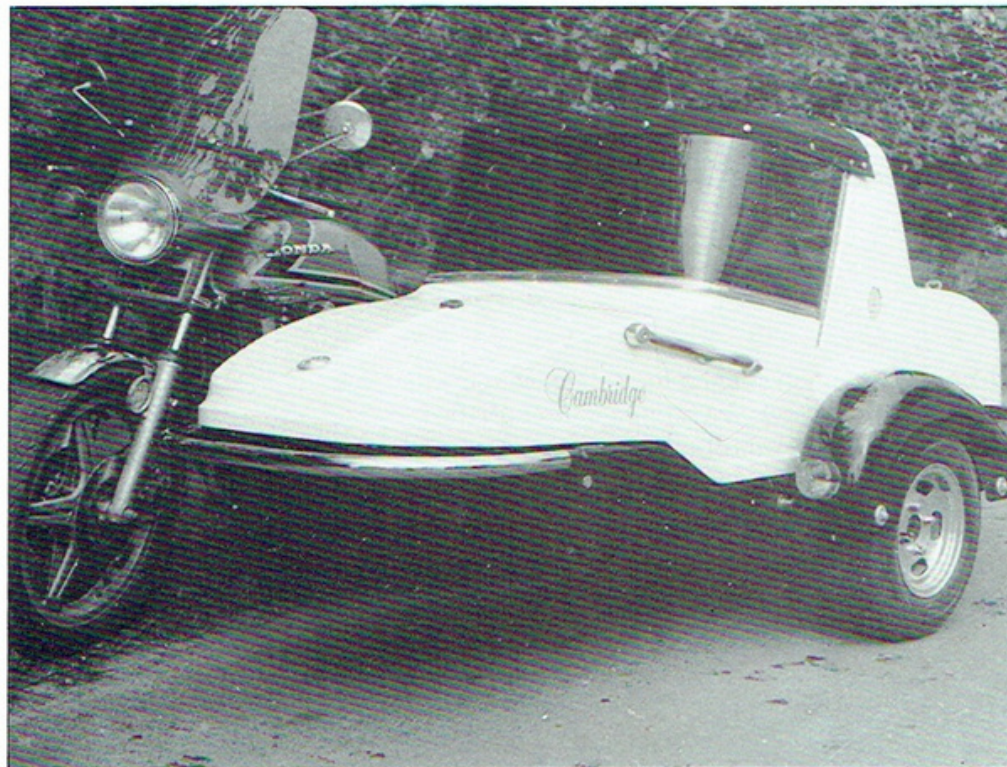

Upholstery can be standard leathercloth or alternative extras of fabric seating or REAL HIDE. This is an excellent model to personalise.

Tow hitches are available.

We offer our own Fitting Service at our Factory, our larger models all have five points of attachment and can be fitted both Right and Left hand.

CAMBRIDGE de LUXE

This model mounted on the same specially widened and strengthened Super Silk Chassis as the OXFORD model (see over) and having the same overall length and width, mudguard, wheel and tyre specification has a full front bench type seat, width 30" (76cm). Access by the hinged lift up dash.

Its highly desirable feature is the extraordinary capacity of the rear locker, which will accommodate camping gear sufficient for three people. Luggage grids are now fitted as standard.

All the extras mentioned for the Oxford are applicable also on this sister model.
